Known History: To find out about the history of this Dart one has to read the story under the heading of Bob Wakeling. Ron Milton bought this Dart from Len Drake in 2008. The chassis was very rusted and badly bent so he built a new one that was as close to the original but modified a bit to accept the Alfa 1750 engine and 5 speed gearbox. The body was in a very poor condition having stood outside at Len Drake's uncovered for about 15 years. The car had been crashed and modified many times. When Ron bought the Dart the targa top moulded into it had been removed. Ron has spent the last year trying to get it into the correct shape. The Dart's body is at the stage of being sprayed..(March 2009)
